

## PRESS RELEASE

**ELIKUKA & Tchtaq**

**OPENING FEBRUARY, 1**

**02/02 – 12/03/2011**

**Private view: Tuesday, February, 1, 2011, 18.00-21.00**

**Regina Berloga is pleased to announce a new project of ELIKUKA & Tchtaq 'Opening February, 1'.**

Human thought in its purest form is aimed at creating products. The product is proof of mental process that can not be refuted. Since the idea - it is the very essence of the phenomenon of life, then you can not stop thinking.

Nature, flora and fauna are negligible compared to the fact that a man can. If you put it in the framework of, the progress will be infinite. In our time, despite the rapid growth of science and technology in various fields, the value of specialization and association of people in connection with this, the progress that gives rise to competition is a fake, because the final result of all - a product or, more precisely, its material value. Product - this is the end. There is nothing behind him. This is the main goal of activity.

It is difficult to overestimate the engineers involved in the static objects like buildings, bridges or energy sources, it is a matter of taste. But it is undeniable that the dynamics and movement are sacred things. The main reason for any of the technical work is the empowerment of human beings to the endless limits of perfection that he can do, the result is unpredictable and unknown to anyone.

We can say that engineering work is the purest form of creativity, free from feelings, religion and philosophy, the only mental, and therefore obliged to be absolutely free.

The exhibition runs from 2 February till 12 March.
